# Why Pedal?

## ▶ Pedal to be Healthy!

Our goal is to help **you stay active** throughout your day and live a healthier life! Since 2009 over 20,000 people have used Profhand Pedal Wheelchair to strengthen their legs, cardio, and respiratory systems! Originally designed as a stroke rehab trainer, Profhand is now used by many people to help live a more **active and healthy life**. Keep your legs moving, it's "Rehab on the Go!"

## ▶ Pedal to be Happy!

Being inactive is not only unhealthy, it's usually not fun. Our patented low-g geared pedaling design **helps to make moving easier and fun**. Pedaling encourages you to be active and enjoy new levels of freedom and happiness throughout the day!

## ▶ Pedal to be Safe!

**Every 17 seconds a fall occurs among the elderly.\*** Family members or caretakers can take comfort in knowing that you are not only maintaining a mobile and active healthy lifestyle, but that you are safely seated while doing so.
